

Features

- Reduced assembly times.
- Simple to assemble and disconnect - No special tools required.
- Corrosion resistant.
- Generous radius on collet protects tubing against chafing.
- Collets marked with tubing size making identification easier.
- Internally machined form in body to secure collet - fewer component parts.
- Specified as standard by many original equipment truck and trailer manufacturers.
- Tube support already installed in each union.
- Sealing rings and thrust washer ready fitted where necessary.
